Career Objective

Motivated 8th-semester Mechanical Engineering student at Gogte Institute of Technology, Belagavi (VTU), with a strong foundation in 3D modeling, EV systems, additive manufacturing, and engineering management. Passionate about developing innovative, efficient, and practical engineering solutions.

Education

- B.E. in Mechanical Engineering – Gogte Institute of Technology, Belagavi (VTU), 2026 | CGPA: 7.76
- PUC/12th – RLS Belgaum, 2021 – 76%
- SSLC/10th – St. Xavier's High School, Belgaum – 73%

Internship

- Completed a 15-week internship at Vision Astraa EV Academy with practical exposure to EV systems, battery management systems, powertrain components, and EV technologies.

Projects

- Amphibious Drone – RC prototype capable of flying, floating, and running on land with water take-off.
- Multi-Directional Drilling Machine – Radial mechanism for multi-directional drilling.
- Smart EV Charging Station – Integrated EV charging solution with smart monitoring features.
- nu3amD Website – Developed personal website to showcase 3D-printed engineering projects.

Workshops & Industrial Exposure

- Indian Foundry Cluster, Belagavi – Metallurgy, foundry processes, quality inspection.
- Pai Engineering Industry, Udyambag – Precision measurement and machining exposure.

Achievements & Activities

- Participated in Design Hackathons and Poster Presentations.
- Active member of Engineers Without Borders – GIT Chapter.
- Strong in public speaking, debates, and group discussions.

- Strong interest in reading self-development and leadership books.
- Actively involved in physical fitness and maintaining a disciplined lifestyle.

Key Skills

- Design & CAD: AutoCAD, CATIA, SolidWorks, Fusion 360
- Analysis Tools: ANSYS, 3DEXPERIENCE, MATLAB
- Core Expertise: Additive Manufacturing, Precision Engineering, Ergonomics, Supply Chain Management, Automation & Robotics, Operations Research
